

Bloxd.io

Team & Socials

Bloxd.io is a UK-born, browser-native voxel game run by a tiny team led by founder Arthur Baker. It scaled from a bootstrapped prototype into a profitable platform with 8M+ monthly players and 17,000+ peak concurrent users. This dossier maps every known developer and contributor, plus the game's official and founder-level social presence. Sourcing leans heavily on the community-run Bloxd.io Fandom Wiki and a June 2025 founder podcast interview; treat usernames and unverified bios as community-reported.

8M+ Monthly players Reported June 2025	17K+ Peak concurrent Founder interview	14 Listed developers Past + present	2021 Launch year Jan 2021

I. The Company at a Glance

1. What Bloxd.io is	A free, browser-based sandbox game heavily inspired by Minecraft. Built on a web-native JavaScript/TypeScript engine (originally the open-source Noa voxel engine), it runs instantly in-browser with no download, and is also published on Google Play and the Apple App Store. - Released January 2021; genre is sandbox/voxel. - Dozens of gamemodes: Survival, Creative, Bedwars, Skywars, Cube Warfare, DimensionZ, Greenville, plus tens of thousands of player-made worlds. - Original systems include an in-game JavaScript Code Block, Board (sign) commands, Moonstone ore, guns/firearms, and tameable pets.
2. Business model & scale	Bootstrapped, profitable, and intentionally small. Founder Arthur Baker described the philosophy on the Studio Vision Podcast (June 2025): web accessibility drives discovery, and JavaScript/TypeScript let a lean team serve the largest possible developer and player base.

“ "Being on the web makes Bloxd incredibly accessible. It's easy for players to find us and get stuck in... JavaScript and TypeScript can really give us the best opportunity to build for that."

Arthur Baker, Studio Vision Podcast (June 2025)

II. Founder & Owner

Arthur Baker OWNER

Full name Arthur Benedict Baker; born November 1999, United Kingdom. Founder and owner of Bloxd.io. Community lore says Microsoft's acquisition of Minecraft partly motivated him to build his own voxel game on a free open-source engine (Noa). He has reportedly been developing Bloxd.io for ~5 years.

- **Education:** Dame Alice Owen's School (~7 years, mostly A grades); University of Bath (4 years, ~80% average).
- **Career before Bloxd:** Software Developer Intern at Veea Systems (POS app); Advanced Labs Leader at University of Bath (teaching first-year algorithms); Product Manager Intern at Microsoft (Office 365 add-ins); Software Engineer Intern at Improbable in 2021 (large-scale Unreal multiplayer, 1000s of players).
- **Built ~15 gamemodes:** Evil Tower, Doodle Cube, Cube Warfare, Peaceful, Bloxd, Survival, Creative, Bedwars, Worlds, Duels, Hide and Seek, TestMode, and more. His first was Bloxd Hop, built with Weiqing.
- **Handles:** Discord *booppee* / *mcarth*; active on LinkedIn (Founder at Bloxd).

“ "I'm Arthur pls don't wake me up."

III. Core & Current Developers

Oliver Redeyoff ACTIVE DEV

UK software developer, born 2000; the most documented current dev after Arthur. Joined the team March 18, 2024. Focuses on technical features, translations, and texture-pack remakes. Self-describes as passionate about the web, with interests in photography, coffee, and music; speaks English, French, and Spanish.

- **Education/career:** University of Bath (2018–2022, first-class honours); placement year at Cognisess (Angular, .NET, SQL, Azure); Cambridge Consultants graduate (2022–2024, firmware + internal web tools); also worked at Picky.
- **Gamemodes:** Walls, Infection, Bingo.

- **Features shipped:** language settings, head bobbing, in-game leaderboard, custom keybinds, Parties, home-screen/world-system revamp, Play Store + App Store releases, Discord login.
- **Public profiles:** personal site oliveredeyoff.com, GitHub (Oliver-Redeyoff), LinkedIn, Stack Overflow. Discord *olired*.

DirtyFleaSack ACTIVE DEV

Aliases DFS / Dirty Flea Sack. Joined the team after getting his Pirates gamemode approved by Arthur. Reported to have made four gamemodes: Pirates, Survival Royale, Factions, and Anarchy. Discord *dirty_flea_sack*; wiki notes his only other account is on the Fandom wiki and warns that other "DirtyFleaSack" accounts are impersonators.

Others in the current roster

The wiki lists several more active developers with thin public profiles. These are confirmed on the developer roster but have limited documented detail.

- Pixelbaker — developer (trending dev page; little public bio).
- Tom — developer.
- Slushie — developer.
- Harry — developer.
- jasninus — developer.
- pegasys (Pegasys) — developer.
- Stan — developer.
- whoisEllie (WhoisEllie) — developer.

IV. Former Developers

Weiqing FORMER

Original creator of bloxdhop.io and an early collaborator. Invited by Arthur to build Bloxd Hop using Arthur's game engine; made most of its maps. Now a former developer and former Discord staff. Discord *weiqing*. Wiki trivia: capable of a sub-17-second run on the Castle map via a roof-scaling skip.

Stardue FORMER

Former developer (female); joined November 6, 2023 and left in 2024. Still holds an admin role on the Bloxd Discord. Built gamemodes Skywars, Prison, Plots, and Rush Racing, and authored a long list of items: potions and the Alchemy Table, splash potions, nametags, books/bookshelves, hang gliders (later tiered), and various foods. Discord *stardue.bloxd*.

“ "made it in my cell using typescript."

Stardue, on how she built the Prison gamemode

Mattzap FORMER / BIZ DEV

Retired developer who reportedly still helps as a "Business Dev." Created four gamemodes (One Block, Greenville, Murder Mystery,

The Pit) and sparked Limited Time Modes. Now works on his own game mageclash.io (site defunct) and develops minefun.io, another Minecraft-style title. Discord *mattzap*.

V. Notable Contributor

JanuaryBoy ARTIST / ADMIN

Freelance pixel/voxel artist and map maker, and a Bloxd Discord administrator who hosts community events. Aliases Ajohn / JanuaryMan / JanuaryBloxd. Created the JamBloxds texture pack and modeled many in-game assets.

- **Maps:** "Big Foods" (Skywars), three Infection maps incl. Airport, and "January" (Rocket Obby).
- **Textures/voxels:** colored & patterned glass, fireball/iceball, alchemy table, vines, ladders, carpets, melons/pumpkins; modeled the Shopkeeper (Wizard skin), pigs, cows, stags, deer, and more.
- **Socials:** YouTube [@JanuaryOtterBoy](#), TikTok [@januarybloxd](#), Reddit [u/JanuaryBloxd](#), Discord *januaryboy*.

VI. Official Social Media & Channels

Where Bloxd.io lives online

The community hub is the official Discord; the X presence is split across two handles. Verify the X account before treating either as canonical, since both appear in results.

PLATFORM	HANDLE / LINK
Discord (official)	discord.com/invite/playbloxd
Website / play	bloxd.io
X / Twitter	@BloxdioOfficial & @OfficialBloxd
TikTok (discovery)	tiktok.com/discover/bloxd-io
Google Play / App Store	Bloxd.io mobile apps (both stores)
Community wiki	bloxd-io.fandom.com

Founder's personal social footprint

Arthur Baker maintains the most visible individual presence. The wiki lists YouTube, X/Twitter, TikTok, Twitch, Instagram, Reddit, Bluesky, and Facebook for him, plus an active [LinkedIn](#). He appeared on the [Studio Vision Podcast](#) (hosted by Andy Ross) in June 2025 for a detailed interview on scaling Bloxd.io.

VII. Research Notes & Caveats

How to read this

Most personnel detail comes from the fan-maintained Bloxd.io Fandom Wiki, which is community-edited and not official. Treat birth dates, employment history, and developer-vs-contributor labels as community-reported rather than confirmed by the company.

- The team is deliberately small; many "developers" are gamemode creators whose work was approved into the game rather than full-time staff.
- Several roster names (Pixelbaker, Tom, Slushie, Harry, jasninus, pegasys, Stan, whoisEllie) have minimal public documentation. Their Discord handles and contributions would need direct confirmation in the official Discord.
- The two X/Twitter handles should be cross-checked; only one is likely the canonical official account.
