

THE BUILDER'S FIELD GUIDE

Bloxd.io Block Codex

Every block you can place in the world — natural terrain, crafted materials, decorative palettes in all 16 colours, functional utilities, and food blocks. No guns, no explosives, no consumables. Just the things you stack to build.

What's excluded & why: Per your ask, this codex leaves out anything that's a weapon, gun, explosive, projectile, or usable/consumable item — so no Moonstone Explosives, Fireballs, Iceballs, Bouncy Bombs, RPG/Grenade/Toxin projectiles, Lucky Blocks, Cannon Blocks, Spawners as combat tools, or edible items. Everything below is a block you can actually *place* into the world to build with.

■ Natural Terrain & Soils 24

The raw ground of every world. Dug with a spade or pickaxe, these form the surface and the bedrock beneath your builds.

CREATIVE ONLY

Source: Compiled from the [Bloxd.io Wiki — Blocks](#), [Blocks/Gallery](#), and [Creative inventory](#) pages. The game has 550+ total entries in the Creative menu; this codex catalogues the placeable building blocks among them. The list evolves — new blocks get added in updates.

Colour swatches are approximations to help you scan the palette — in-game textures have pixel detail and shading. Built for viewing in Dia.
