

BLOXD.io

The complete field guide to the  menu – every setting, the shop, the full UI, and the entire texture-pack system.

How to open the menus

[start here](#)

The settings panel has four tabs: **General**, **Graphics**, **Controls**, and **Texture Pack**.

Menu	Keyboard	Mouse / Mobile
Settings / Pause	 or 	Gear icon, top-right
Skin / Customization		T-shirt icon, bottom-left
Shop (B-menu)		Cart icon, left of hotbar
Player list		List icon by the t-shirt
Invite friends		Add-friends icon by the gear
Chat	 / Enter	—
Hide UI	 / 	—

Settings – General tab

9 options

Setting	What it does	Default / Range
Language	Interface language – 20 options (full list below).	English
Music Volume	Background music level.	50 (0-100; 0 = mute)
Sound Effects Volume	In-game SFX level.	50 (0-100; 0 = mute)
Disable Full Screen Mode	Stops auto-fullscreen. Helps in Safari, where fullscreen can trigger a "site may be stealing data" warning.	Off
Show Coordinates	Displays your X/Y/Z position.	Off
Show Chunk Coordinates	Shows your current chunk (chunks are 32×32×32 blocks) + position within it.	Off
Show FPS	Live frames-per-second counter.	Off
Disable Bunny Hopping	Bunny hopping is a brief speed boost on landing a jump. Toggle to turn it off.	Off (hopping on)
Show Chat	Hides/shows chat. ⚠ Chat is the only way to talk to players AND how the game relays info – hiding it means missing messages.	On

ALL 20 LANGUAGES

Settings – Graphics tab

9 options

Setting	What it does	Default / Range
Chunk Load Distance – Horizontal	How far you see sideways. Higher = more view, more lag.	2 (range 2-10)
Chunk Load Distance – Vertical	How far you see up/down.	2 (range 2-3)
Lighting	Turns the Lighting System on/off.	—
Fog reload	Distance at which fog appears. Looks better, lowers visibility. Needs a page reload to toggle.	Off
Disable Block Texture Atlas	Turn ON if blocks render all-black. Reduces lag — but texture packs stop working while disabled.	Off
Field Of View (FOV)	View width. Low = zoomed/narrow; high = wide but distorted edges.	—
Anti-aliasing reload	Smooths jagged edges via extra sampling. Needs a page reload.	—
Pixel Scale	Pixel size "for a retro appearance." 1 = normal; higher = blurrier (hurts gameplay).	1 (range 1-8)
Pixel Smoothing	Smooths individual pixels so they're less noticeable.	—

Reload-required: Fog, Anti-aliasing, and applying any Texture Pack all need a page refresh to take effect.

Removed settings (history): "Reduce Lag" (appeared one day only) and "Enable Lighting" (old toggle, since replaced).

Settings – Controls tab + full keybinds rebindable

Settings — Texture Packs (deep dive) crazy detail

Player Customization (the N menu) free

The Cosmetic Shop limited-time

Super Rank (subscription) cosmetic only

Quick cheat-sheet

tl;dr

- **O** / **Esc** settings · **N** skins · **B** shop · **G** player list · **I** invite
- Tabs: **General** · **Graphics** · **Controls** · **Texture Pack**
- **Reload the page** after changing Fog, Anti-aliasing, or any Texture Pack.
- Blocks all black? → turn OFF "Disable Block Texture Atlas" (re-enables lag too).
- Texture packs = **textures/** (named PNG) + **skyBoxes/** (6 faces) + **models/** (.glb), or a JSON **blockAtlas**.
- Default atlas: i.imgur.com/oc70r8J.png · Tools: github.com/Bloxdy/texture-packs
- Free customization = skin/hair/eyes/tops/legs/shoes. Capes + name color = **Super Rank**.
- Shop packs are **limited-time** & each gives a free **30-day Super Rank**.
