

A FIELD CODEX FOR THE AURA-TOUCHED

The Bloxd.io Enchantment Codex

Every enchantment in Bloxd.io — what it does, what it scales to, what it goes on, and how to actually farm the Aura XP to afford it. Plus the Dungeons custom enchants and the legendary patched glitches.

RARITY LEVELS

How enchanting works

*Enchantments are permanent upgrades to armour, weapons, and tools. You spend **Aura XP levels** at an Enchantment Table, and the game randomly rolls both the effects and their power. You don't get to pick — but you can re-roll forever.*

THE TWO NUMBER SYSTEMS

- ♦ **Power tiers (I, II, III):** how strong a single effect is. III is strongest.
- ♦ **Item tiers (1–5):** the *total* power points your item receives. The roman numerals of all effects must add up to your item tier.
- ♦ Example — a **Tier 5** roll could be **III + II** (one strong + one medium) or **I + II + II** (three effects). Same budget, different spread.
- ♦ Higher item tier = more total enchant power, but it's randomly assigned.

THE ENCHANT FLOW

- ♦ Drop your item into the left slot of the table UI.
- ♦ Possible effects appear below with short descriptions.
- ♦ Three random **prices** (in XP levels) show on the right, each with the odds of getting each tier. Pay more → better odds.
- ♦ Don't like the result? Pull the item out, drop it back in, and re-roll. New enchants **overwrite** the old ones.

THE RE-ROLL LOOP IS YOUR FRIEND

Because re-rolling overwrites the previous result with no penalty (beyond XP), the meta is: bank a huge pile of Aura XP, then re-roll on a Diamond table until you hit the exact combo you want (e.g. Damage III + Crit II on a sword).

Every enchantment

Twenty-five effects across combat, defense, ranged, gathering, and utility — including the admin-exclusive and custom ones from Bloxd Dungeons. Use the search bar and filters above to slice the list.

Damage

SWORD & STICK

Increases damage dealt.

I +20% damage

II +32% damage

III +40% damage

META PICK

Critical Damage

SWORD

Increases the damage dealt by critical hits.

I +42% crit dmg

II +51% crit dmg

III +58% crit dmg

META PICK

Attack Speed

SWORD

Increases how frequently you can land attacks on players or mobs.

I Faster

II Faster+

III Fastest

Stomp Damage

SPIKED BOOTS

Deals more damage when you land on players or mobs from above.

I More

II More+

III Most

Horizontal Knockback

KNIGHT SWORD & STICK

Increases the horizontal knockback of your hits — shove enemies away.

I More KB

II More KB+

III Most KB

Vertical Knockback

STICK

Increases the vertical knockback of hits — launch enemies upward.

I More

II More+

III Most

Health

ARMOR

Increases your maximum health by 4 per level.

I +4 max HP

II +8 max HP

III +12 max HP

META PICK

Health Regen

ARMOR

Regenerates your health faster.

I Faster

II Faster+

III Fastest

Protection

ARMOR

Further reduces the amount of damage you take.

- I Reduced
- II Reduced+
- III Most reduced

META PICK

Knockback Resist

FUR CHESTPLATE

Reduces the knockback you take from hits — hold your ground.

- I Resist
- II Resist+
- III Max resist

Arrow Damage

BOW & CROSSBOW

Increases the damage dealt by arrows you shoot.

- I +23.5% dmg
- II +35% dmg
- III +44% dmg

META PICK

Arrow Speed

BOW & CROSSBOW

Increases the speed and range of your shot arrows — flatter trajectory.

- I Faster
- II Faster+
- III Fastest

Quick Charge

BOW & CROSSBOW

Reduces the time taken to charge a bow — fire sooner.

- I Quicker
- II Quicker+
- III Quickest

Break Speed

TOOLS

Increases the speed of breaking blocks.

- I Faster
- II Faster+
- III Fastest

Momentum

TOOLS

Further increases break speed the more blocks you break in a short time — builds up.

I Ramp

II Ramp+

III Max ramp

Mining Yield

PICKAXE

Increases the amount of materials dropped when mining ores.

I +drops

II +drops+

III Max drops

Mining Aura

PICKAXE (NOT MOONSTONE)

Increases Aura XP gained when mining ores. Funds your future enchants.

I +XP

II +XP+

III Max XP

Farming Yield

HOE

Increases the amount of materials dropped when farming.

I +drops

II +drops+

III Max drops

Farming Aura

HOE

Increases Aura XP gained when farming crops.

I +XP

II +XP+

III Max XP

Lumber Yield

AXE

Increases the amount of materials dropped when chopping trees.

I +drops

II +drops+

III Max drops

Lumber Aura

AXE

Increases Aura XP gained when chopping trees.

I +XP

II +XP+

III Max XP

Digging Aura

SPADE

Increases Aura XP gained when digging blocks (dirt, sand, gravel).

I +XP

II +XP+

III Max XP

Thorns

ARMOR (DUNGEONS)

Deals damage back to whoever attacks you — 3 damage per total level. A coded custom enchant, not in base Bloxd.

I ~3 dmg

II ~6 dmg

III ~9 dmg

CUSTOM / DUNGEONS

Fire Resistance

ARMOR (DUNGEONS)

Blocks lava and fire-based damage while the armour piece is worn. Custom Dungeons enchant.

I Resist

II Resist+

III Immune

CUSTOM / DUNGEONS

Stunning Blows

SWORD (DUNGEONS)

Applies slowness and weakness to targets you hit. Custom Dungeons enchant.

I Brief

II Longer

III Longest

CUSTOM / DUNGEONS

Stunning Arrows

BOW (DUNGEONS)

Arrows inflict slowness and weakness on the target. Custom Dungeons enchant.

I Brief

II Longer

III Longest

CUSTOM / DUNGEONS

Poison Tipped

SWORD (DUNGEONS)

Applies poison damage to targets you hit. Admin-exclusive in Bloxd Dungeons.

I Poison

II Poison+

III Poison++

CUSTOM / DUNGEONS

ADMIN ONLY

Poison Armor

ARMOR (DUNGEONS)

Applies poison to whoever attacks you. Admin-exclusive in Bloxd Dungeons.

I Poison

II Poison+

III Poison++

CUSTOM / DUNGEONS

ADMIN ONLY

Enchantment tables & rarity

Five table grades, from wooden (newbie) to diamond (endgame). The better the table, the higher your odds of strong rolls — and the steeper the XP cost.

TABLE	XP COST / ROLL	HIGH-TIER ODDS	WHO IT'S FOR
Wood	1–6 levels	Very low	Newbies — first enchants
Stone	3–12 levels	Very low	Starters
Iron	7–22 levels	Low, but tiers raised	Decently good players
Gold	29–41 levels	Moderate	Experienced players
Diamond	~43–80 levels	Very high	Dedicated / endgame

RARITY → NUMBER OF EFFECTS

RARITY	EFFECTS GRANTED
Common	1 enchant
Uncommon	2 enchants
Rare	3 enchants
Epic	4 enchants
Legendary	5 enchants

All tables can enchant every item type: swords, tools (axe, pickaxe, hoe, spade), armour, both bow types, and the stick. Best tool to mine a table itself is an axe; they stack to 999.

Farming Aura XP

Enchanting is gated entirely by Aura XP levels. Here's every way to earn it — and the warning that comes with dying.

WAYS TO EARN XP

- ♦ Breaking **mob spawners**
- ♦ Harvesting crops
- ♦ Killing mobs & players (*deaths in spikes give no XP*)
- ♦ Mining ores (*not with a Moonstone pickaxe*)
- ♦ Smelting raw iron & gold
- ♦ Consuming Aura XP fragments, orbs, potions, splash potions, or being hit by Aura XP arrows
- ♦ Sleeping — stay on a bed for at least 10 seconds

THE ORB BONUS & THE DEATH TAX

- ♦ Most XP actions (except sleeping) have a **small chance to drop an Aura XP Orb** — eating one gives +3 XP levels instantly.
- ♦ **Mining Aura** and **Digging/Farming/Lumber Aura** enchants multiply the XP from those activities — they pay for your future enchants.

DEATH TAX

When you die you lose **exactly half** your XP. Had 5 levels? You respawn with 2.5. Bank XP into enchants before risky fights.

⚠ PATCHED INFINITE-XP GLITCHES (HISTORY)

Both discovered **05/16/2025**, both patched **05/17/2025** — they no longer work, but they're legendary:

- ♦ **Crop Clicking:** right-clicking fully grown Wheat or Rice gave Aura XP from the same crop infinitely.
- ♦ **Protector Breaking:** breaking Coal/Iron/Gold/Diamond/Moonstone ore or grown crops dropped Aura XP but the block instantly reappeared.

Best-in-slot loadouts

Community-favored enchant combos. Remember you can't pick rolls directly — these are the targets to re-roll toward on a Diamond table.

SWORD

✂ The Duelist

Damage III + Critical Damage II. Max raw output. Damage III adds +40% base, Crit II boosts crits +51%. The standard PvP sword.

ARMOUR (PER PIECE)

The Tank

Protection III + Health II on most pieces; swap one piece to **Protection III + Health Regen II**. A full diamond set this way is the survival benchmark.

PICKAXE

⛏ The Miner

Break Speed III + Momentum II for raw speed, or **Mining Aura + Mining Yield** to snowball XP and ore drops. (Moonstone picks can't take Mining Aura.)

BOW / CROSSBOW

The Archer

Arrow Damage III + Quick Charge II. Hit harder and fire faster. Add Arrow Speed if you want flatter, longer-range shots.

Compiled from the Bloxd.io Wiki ([Enchanting](#), [Enchantment Tables](#)) and the [Bloxd Dungeons Wiki](#). Values reflect the game as documented in mid-2025; Bloxd.io updates often, so check in-game tooltips for the latest.
